

# AssetVantage™

*Software Suite Designed to Meet the Needs of Today's Utilities and Governments*

**AssetVantage™** Software Suite designed by Technologies To Be, Inc. is a fully integrated Asset and Resource Management Solution. It includes systems and processes that enable a utility or government to manage projects from start to finish, improve customer service, extend the life of existing assets and satisfy increasing regulatory requirements (Customer Choice and GASB 34).

**AssetVantage™** Software Suite is a comprehensive, affordable enterprise wide solution that meets the needs of management and IT departments to make fast accurate decisions to achieve maximum productivity. The **AssetVantage™** Software Suite is powerful, yet easy to use. It streamlines business processes, manages the entire workflow and minimizes operational costs.

**AssetVantage™** Software Suite has the ability to complement many different existing systems, increasing the benefits of a utility or governments existing and future applications.
